Pattern instructions:

1. Cut the collar band and iron it on the folding line.

2. There are two options for the cutting layout:

1. Fold the fabric in the folding line on the back from the right side to the left side <-. Then fold it in the centre from bottom to top ^ and then fold it in the centre from the left side to the right side ->. Now you can cut the whole pattern with one cut! Just cut the curve from the left corner to the right corner / and it's done.

2. If your fabric is too heavy for the one cut method just copy the pattern to the fabric and cut it.

3. Close the side and shoulder seam and iron the seam allowance.

4. Iron the seam allowance on the 4 sleeve pieces. Fold the seam allowance on each of the 9 corner into a mitred corner and stitch it.

5. Iron the seam allowance on the armhole and stitch the sleeves on the sleeve cap close to the edge (Colour Mark).

6. Iron the hem and facing allowance. Now fold the corner into a mitred corner and stitch it.

7. Close the seam on the collar band to the both marks and turn it over. Now secure the open seam on the facing with safety pins and close the seam.
